Transitions

COLLECTION

Imagine open spaces warmed with rich textile effects, defined by texture and brought alive with subtle coloration. That's Transitions from Atlas. This new collection allows for seamless transitions as easily as choosing a different pattern within a color story.

In addition to the four cohesive patterns **Grand Entrance**, **Effect**, **Impact** and **Conclusion**, you'll find LVT coordinates for endless creative possibilities.

CONCLUSION | Ashlar Monolithic

Grand Entrance

SHOWN ON COVER : Herringbone

First impressions matter, and Grand Entrance infuses confidence with a boldly deconstructed textile. This is the place to be, rich in texture and movement, with grand dimension. And like all four Transitions collection patterns, Grand Entrance is an environmentally preferred product.

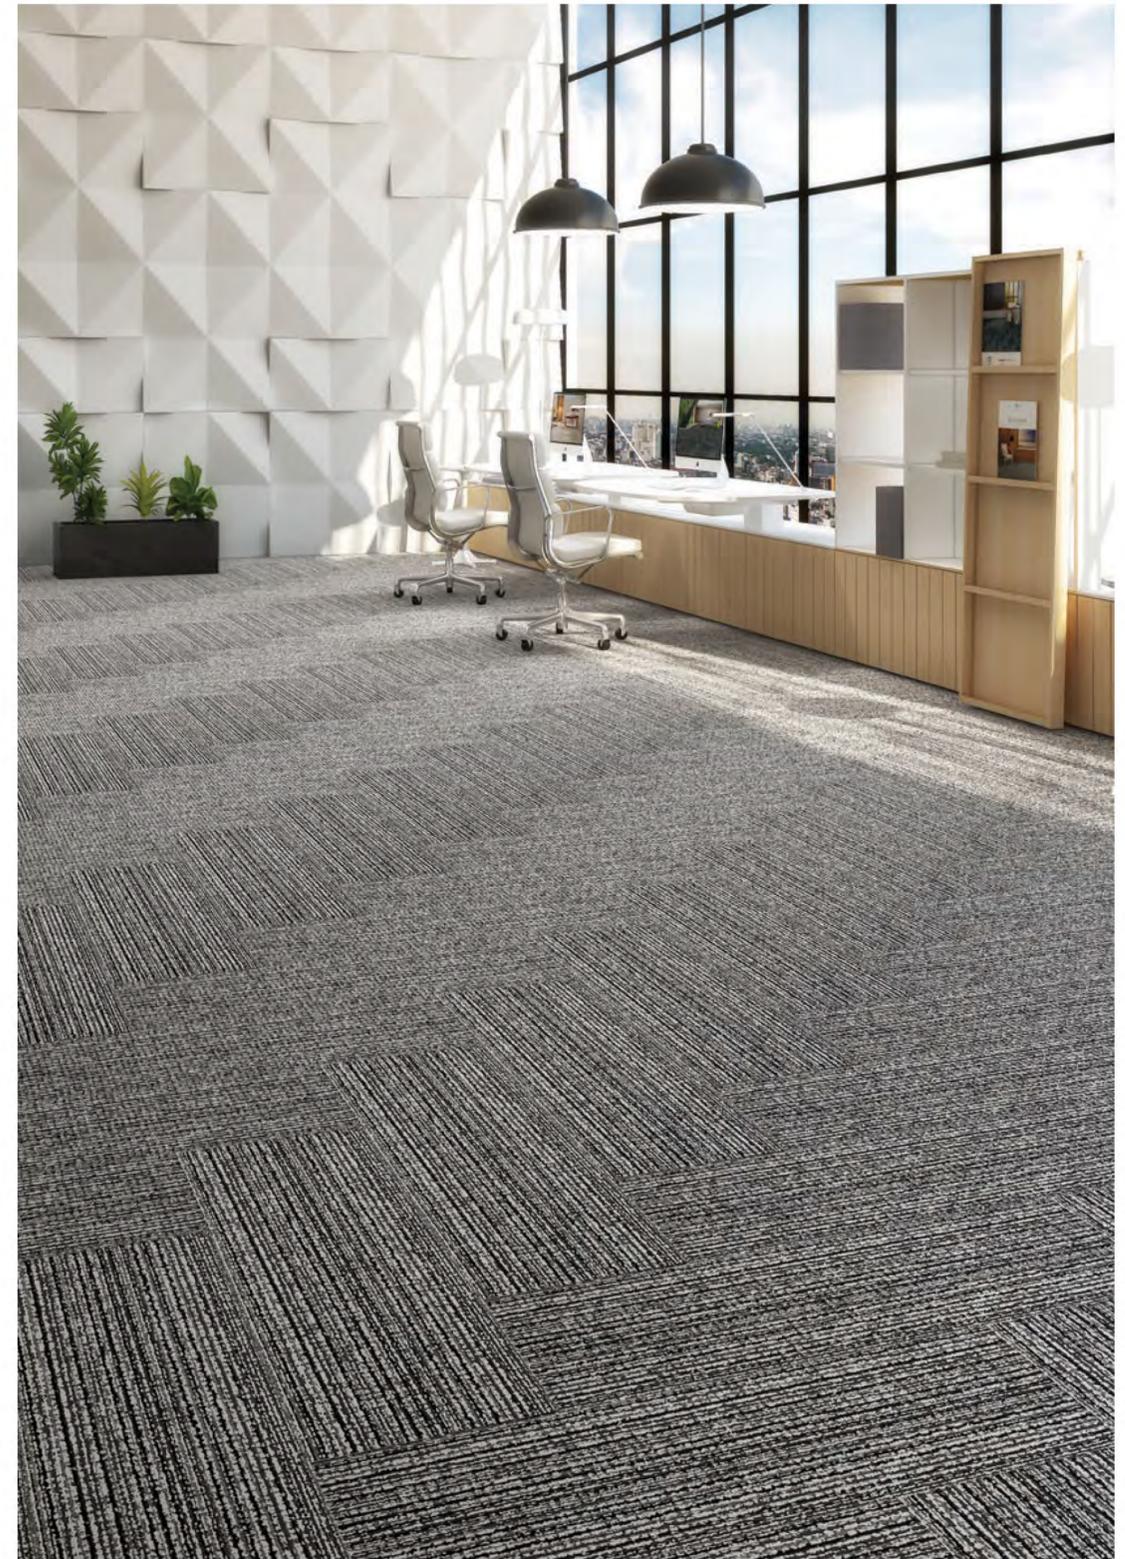

SHOWN : Herringbone

Impact

When professional appearance calls for tweed, Impact delivers with subtlety and style. A linear, nubby stripe lends itself to purposeful pattern interplay in 12"x36" plank tile. A clean, tailored choice for warm, inviting spaces.

OPPOSITE PAGE : Herringbone

Effect

Within the free grid of Effect's bold textile look, color contrast carries the day. Adding depth and drama to any space, Effect also reflects the warm characteristic of the entire Transitions collection.

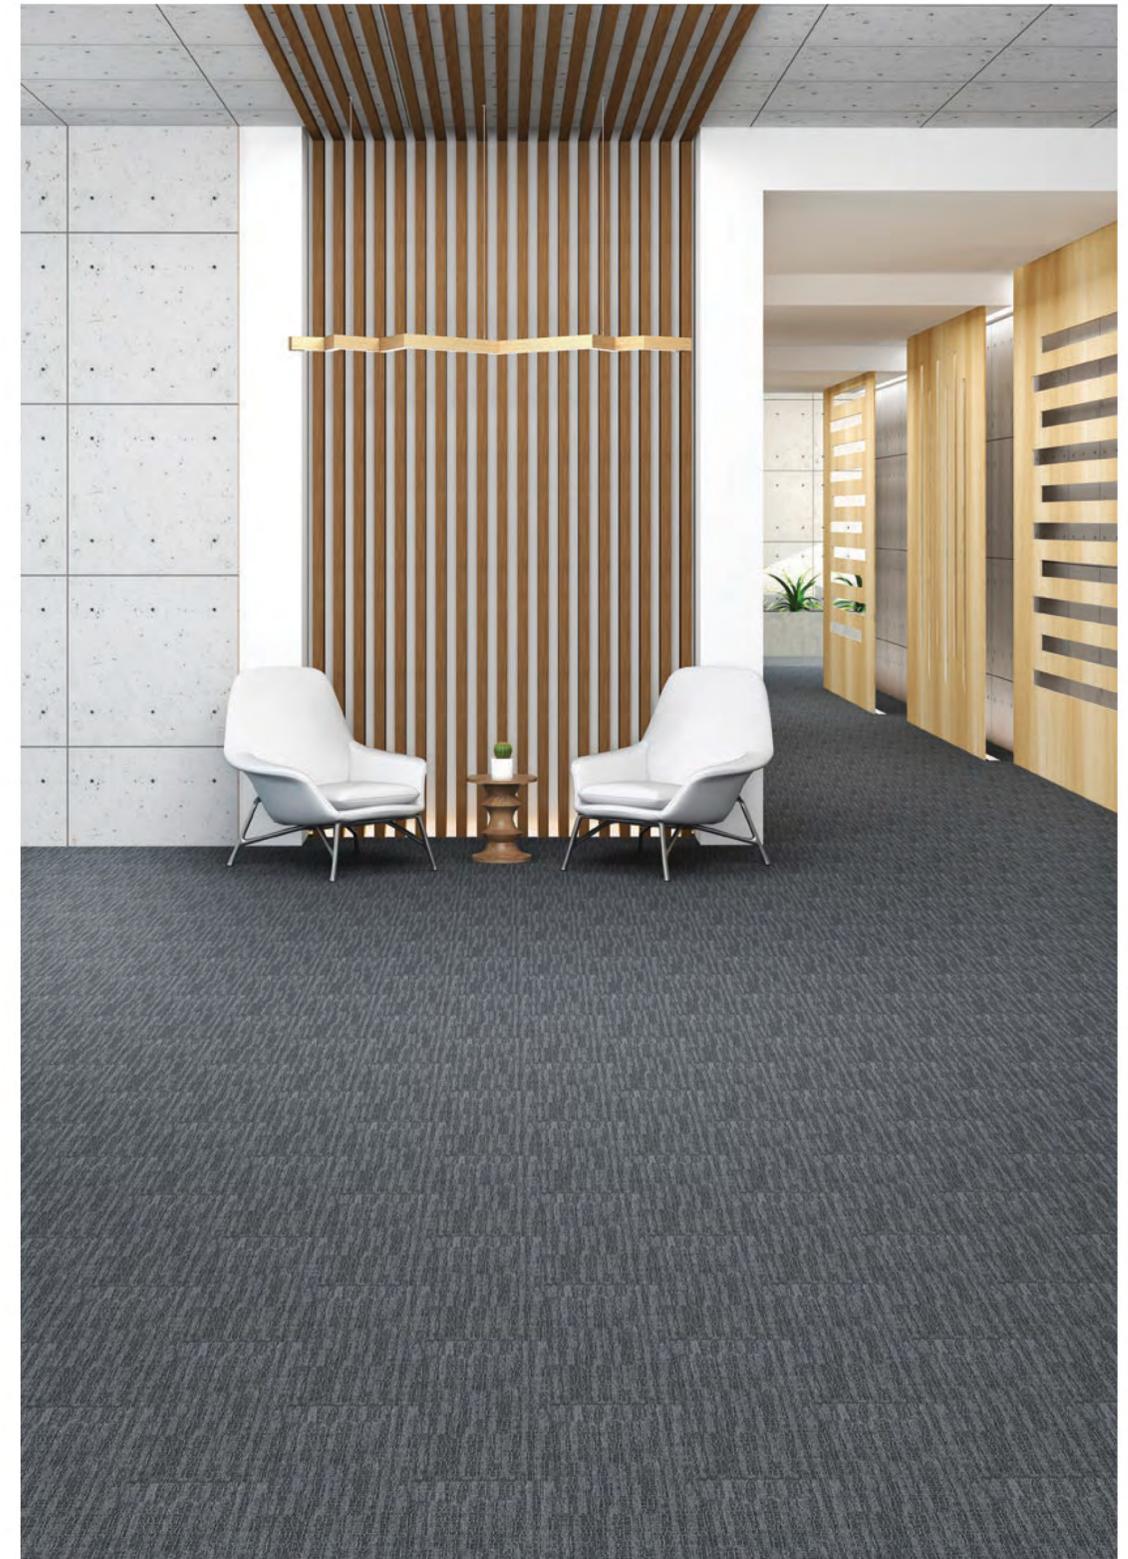

Conclusion

A loose, lattice-like effect makes for a calming Conclusion. Softer contrast provides a near-solid overall effect for ideal pattern interplay. Or pair with coordinating LVT hard surface for texture contrast and subtle transitions.

Complementary color families highlight your design.

Gathering the colorways of the Transitions collection into five color stories makes it easier than ever to set a mood. Choose the warm olive tones of Grounded, perhaps with the warm and cool taupes of Essential. Moody brings in classic blue, while Intentional goes for drama in black and white. Finally, there's the fashion forward gilded green, black and cream of Ambitious.
